AI/ML Engineer | Ahmedabad, Gujarat, India

Professional Summary

AI/ML-focused Computer Science undergraduate skilled in Python and NLP, with hands-on experience building LLM chatbots and RAG applications using LangChain, vector databases, Ollama, and Hugging Face. AI Intern at Ativeg Technologies and Final Round participant at the Odoo x Indus University Hackathon 2026.

Education

Bachelor of Technology in Computer Science Engineering — Expected May 2027
Indus Institute of Technology & Engineering, Indus University — *Ahmedabad, Gujarat*

Technical Skills

Languages: Python
AI/ML Frameworks: PyTorch, TensorFlow, Scikit-learn
Generative AI & LLMs: LangChain, RAG, Vector Databases, LLM APIs, Ollama, Hugging Face, Chatbot, LangGraph & Agentic AI (Learning)
Deep Learning & NLP: Neural Networks, Deep Learning, NLP, spaCy, TF-IDF, Hyperparameter Tuning
Data Science & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Feature Engineering, Data Visualization
Tools: Git, GitHub, Jupyter Notebook, Google Colab, PostgreSQL

Work Experience

AI Intern — Indus University — **Jun 2024 – Jul 2024**

- Completed a one-month AI internship covering machine learning, deep learning fundamentals, and neural network concepts.

AI Intern — Ativeg Technologies — **Jul 2026 – Present**

- Working on NLP and AI/ML projects while building skills in Generative AI, LangChain, RAG, and agentic AI workflows.

Projects

LifeOS – AI Healthcare Platform | *GenAI, NLP, ML (In Development)* — GitHub

- Developing an AI healthcare platform covering symptom analysis, medical record understanding, personalized fitness and nutrition recommendations, medication management, and health tracking.
- Integrating Generative AI, NLP, and recommendation systems to turn user health data into personalized insights and summaries across multiple wellness modules.

AI Resume Intelligence | *Python, FastAPI, spaCy, React, PostgreSQL* — GitHub

- Built a full-stack resume screening platform where candidates upload PDF resumes and recruiters search and rank candidates by job role and skills.
- Implemented NLP extraction with spaCy (NER, skill matching), TF-IDF job role prediction, a weighted 100-point ranking algorithm, JWT role-based authentication, and PDF report export.

RAG-Based Study Assistant | *Python, RAG, Ollama, Qwen3, Sentence Transformers* — GitHub

- Developed a locally running, RAG-based study assistant that enables users to upload PDF documents and ask questions grounded in their content.
- Integrated Ollama with a local LLM and semantic retrieval to generate document-based answers with source citations, supporting offline use without paid AI APIs.

Honors & Achievements

Odoo x Indus University Hackathon 2026 – Reached the **Final Round** (Apr 4–05, 2026), organized by CSE Department, IITE, Indus University.

AI Internship Certificate of Appreciation – Indus University (Jun–Jul 2024).
